**Job Title: Assistant Professor of Biology**

The Biology Department at Washington and Jefferson (W&J) College invites applicants for a full-time tenure track assistant professor position starting in fall 2011. We are seeking a molecular biologist with training in molecular evolution/systematics, bioinformatics, or genomics. Candidates must be strongly committed to undergraduate education and provide evidence of excellence in teaching. The successful candidate will teach lecture and laboratory courses including molecular biology, evolution, general biology, and other courses in his/her field of expertise, and may also contribute to teaching in a junior level seminar and an integrated freshman experience. The candidate will be expected to work with other faculty to integrate modern molecular biological approaches into the curriculum and to develop a research program involving undergraduate students. Ability to contribute to interdisciplinary programs, such as biochemistry, environmental studies, or neuroscience, and experience in collaborative grant writing is desirable.

To apply, send a *curriculum vitae*, graduate and undergraduate transcripts, statements of teaching philosophy and research interests, and three letters of recommendation along with contact information for your references to hr@washjeff.edu. Completed applications must be received no later than August 10, 2010.

Washington & Jefferson College is committed to increasing diversity in our community and actively pursues individuals from all backgrounds. Additionally, W&J College complies with all applicable federal, state and local laws and provides equal opportunity in all educational programs and activities, admission of students and conditions of employment for all qualified individuals regardless of race, color, sex, religion, age, disability, sexual orientation, or national origin.

W&J is a private, co-educational, national liberal arts college of 1500 students located 30 miles south of Pittsburgh. Visit us at www.washjeff.edu.
